RE: SUMMER RESEARCH EXPERIENCE, JOHN ROBERT CORNISH

This is a letter of support for John Robert Cornish and his application for a Summer Research Experience position with the Melbourne School of Engineering. He was the top student in my class on Digital System Design in Semester 1, 2013, which had an enrollment of around 160 students. His excellent performance in this subject and other experiences place Rob in a good position to successfully pursue projects involving digital system design and implementation using FPGA and microprocessor based hardware. I strongly recommend him for the Summer Research Experience.

Sincerely,

Michael CANTONI  
Associate Professor  
Electrical & Electronic Engineering  
The University of Melbourne, VIC 3010, Australia
